# DARK DRIVERS SPEED

The DARKSPEED drivers feature an improved aero shape, a larger PWR-SHELL Face, and a lower and more forward PWR-BRIDGE to deliver more ball speed and distance. Three models (LS, X, and MAX) utilize specific weighting configurations to tailor performance for each player target.

# DARK SPEED

## DRIVER TECHNOLOGY

Designed by Aerospace Engineers, the Darkspeed Drivers feature dramatic improvements in aero shaping and internal and external technologies to deliver out of this world speed.

### LARGER PWRSHELL H.O.T. FACE

A 10% larger PWRSHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

### LOWER & MORE FORWARD PWR-BRIDGE

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

### CARBON CROWN AND SOLE

A lightweight carbon crown and sole piece replaces Titanium, allowing for better redistribution of weight to improve mass properties.

### FASTER AERO SHAPING

An improved aero shape features a streamlined topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

### ENHANCED TRAJECTORY TUNING

The LS, X, and MAX models feature more adjustability options for a better ability to optimize spin & forgiveness.

The LS model features a Tour inspired shape for better players that demand low spin and low launch for maximum workability and control.

**REFINED AERODYNAMIC DESIGN**

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

**TOUR INSPIRED SHAPING**

A refined clubhead shape features a reduced visual footprint at address that promotes workability and control.

**LARGER PWRSHELL WITH A.I. DESIGNED H.O.T. FACE**

A 10% larger PWRSHELL L-cup face creates more robust distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

**UNLOCK FASTER BALL SPEED**

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

**MAX WORKABILITY WITH ADDED FORGIVENESS**

Adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

\*Custom only

The X model is designed for Tour and amateurs seeking a fast, low spin head that offers medium launch and plenty of forgiveness.

**REFINED AERODYNAMIC DESIGN**

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

**TOUR INSPIRED SHAPING**

A refined clubhead shape features an elevated look at address that promotes workability and control with added forgiveness.

**LARGER PWRSHELL WITH A.I. DESIGNED H.O.T. FACE**

A 10% larger PWRSHELL L-cup face creates more robust distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

**UNLOCK FASTER BALL SPEED**

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

**BLENDED OF FORGIVENESS & SPIN CONTROL**

A back weight is now accompanied by a second forward weight, allowing for additional spin tuning control.

The MAX model delivers draw-bias and unrivaled stability in a low-mid spin design for ultimate distance and accuracy.

**REFINED AERODYNAMIC DESIGN**

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

**SHAPED FOR SPEED AND FORGIVENESS**

A refined clubhead shape blends speed with forgiveness for an elevated look at address that inspires maximum confidence on the tee.

**MORE ROBUST LAUNCH**

A 10% larger PWRSHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

**UNLOCK FASTER BALL SPEED**

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

**MAX FORGIVENESS & DRAW-BIASED CONTROL**

Adjustable back and heel weight positions allow you to fine-tune draw bias in our most forgiving driver head.

## FAIRWAY TECHNOLOGY

The LS model is our first fairway featuring a Titanium construction, delivering driver-like performance, and significant distance gains compared to a traditional fairway design

### CARBON CROWN

A lightweight carbon crown replaces Titanium, allowing for better redistribution of weight to improve mass properties.

### LARGER PWRSHELL H.O.T. FACE

An A.I. designed PWRSHELL H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

### TUNGSTEN WEIGHTING

Internal tungsten weights are strategically positioned in the heel and toe areas to improve stability for tighter dispersion and pinpoint accuracy.

### ENHANCED TRAJECTORY TUNING

In the LS model, adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

### LOWER & MORE FORWARD PWR-BRIDGE

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

The LS model features our first ever Titanium fairway construction for driver-like performance in a refined clubhead shape tailored for precise shot shaping.

Custom only

### TOUR INSPIRED SHAPING

Subdued clubhead styling inspires a Tour-validated look and feel at address.

### TITANIUM CONSTRUCTION

A multi-material construction blends a lightweight 8-1-1 Titanium body and face, and a carbon crown to improve weight distribution for more distance.

### TIGHTER DISPERSION WITH TUNGSTEN WEIGHTING

Internal and external tungsten weights are strategically positioned in the heel and toe areas to improve stability for tighter dispersion and pinpoint accuracy.

### FASTER BALL SPEED

The PWRSHELL insert and suspended PWR-BRIDGE design create a more flexible face and sole for penetrating launch and maximum ball speed.

### SPEED & SPIN OPTIMIZATION

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

### MAX WORKABILITY WITH ADDED FORGIVENESS

Adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

The X model is designed for versatile shot making and plenty of forgiveness to make your long game more consistent.

**MORE LAUNCH. MORE BALL SPEED.**

The PWRSHELL insert and suspended weight PWR-BRIDGE design create a more flexible face and sole to maximize launch and ball speed.

**SPEED & SPIN OPTIMIZATION**

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

**FORGIVENESS & HIGH LAUNCH**

A back weight is utilized to promote high, towering ball flights for maximum carry distance.

**TIGHTER DISPERSION**

A lightweight carbon crown improves weight distribution to position the CG lower and further back, creating a more playable clubhead.

The MAX Women's model features tunable draw-bias and unrivaled stability to inspire maximum confidence from the fairway or off the tee.

**MORE LAUNCH. MORE BALL SPEED.**

The PWR-SHELL insert and suspended weight PWR-BRIDGE design create a more flexible face and sole to maximize launch and ball speed.

**SPEED & SPIN OPTIMIZATION**

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

**MAX FORGIVENESS & DRAW-BIASED CONTROL**

Adjustable back and heel weight positions allow you to fine-tune draw bias in our most forgiving head.

**TIGHTER DISPERSION**

A lightweight carbon crown improves weight distribution to position the CG lower and further back, creating a more playable clubhead.

The DARKSPEED hybrid blends distance and high launch to provide more forgiveness on longer approach shots and adaptability across different lies.

**CONFIDENCE INSPIRING SHAPE**

A deep body design paired with a high bounce leading edge provides improved turf interaction and stability through any turf condition.

**FASTER BALL SPEED**

The PWR-SHELL insert and suspended PWR-BRIDGE design create a more flexible face and sole for penetrating launch and maximum ball speed.

**SPEED & SPIN OPTIMIZATION**

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

**FORGIVENESS & HIGH LAUNCH**

A 12g sole weight is positioned as low as possible to promote high, towering ball flights for maximum carry distance.

# DARK SPEED

## IRON TECHNOLOGY

Unlock your distance potential with an all new hollow construction that creates our longest and most robust iron design yet.

### LARGER PWR-SHELL H.O.T. FACE

A larger PWR-SHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

### SOFTER FOAM MICROSPHERES

The hollow cavity is filled with a softer 920D foam material that damps vibrations for improved sound and feel.

### HOLLOW BODY CONSTRUCTION

A hollow metalwood construction creates a more unsupported face to maximize ball speed and distance.

### PWR-BRIDGE WEIGHTING

A PWR-BRIDGE weight is suspended on a single post to encourage more body and face flexion for faster ball speed.

# DARK SPEED

# IRONS

Unlock your distance potential with an all new hollow construction that creates our longest and most robust iron design yet.

### POWERFUL BALL SPEED AND DISTANCE

A larger PWR-SHELL insert and a refined PWR-BRIDGE weight create a more unsupported face for extreme flexibility and speed.

### TUNED ACOUSTICS AND FEEL

The hollow cavity is filled with soft foam microspheres to deliver exceptional sound and feel.

### EXTREME ACCURACY

An A.I. designed H.O.T. Face delivers more efficient speed and spin and produces a larger sweet spot for more looks at birdie.

Each iron is crafted using 1025 carbon steel and forged five times to deliver a player-preferred soft feel and a compact shape. A second black colorway features a durable DBM finish, and is available through custom only.

**REFIND SHAPING**

Experience unrivaled ball-striking through a sleeker and refined shape featuring a thinner topline and reduced offset that inspires precision and playability.

**ENHANCED FEEL THROUGH FORGING & FOAM TECH**

Each iron is crafted from 1025 carbon steel and precision-forged 5 times to deliver soft, player-preferred feel. A hollow body design is filled with a lightweight foam that enhances feel and feedback.

**FORGIVING HOLLOW BODY DESIGN**

Dynamic distance is unleashed using a hollow body, thinner PWRSHELL Face, and 20g of tungsten for added stability.

Exhilarating distance and forgiveness is achieved through 65g of tungsten, and a hollow body design, giving you the keys to become the player you've always wanted to be.

**PLAYERS LOOKS WITH FORGIVENESS**

The Forged TEC X irons occupy a unique category of their own, offering unrivaled forgiveness with players' looks. Sleek shaping meets soft, forged-like feel, and 65g of tungsten for extreme stability.

**FOAM INSERT FOR ENHANCED FEEL**

A hollow body is filled with lightweight foam to create a softer, forged-like feel on every swing.

**FORGIVING HOLLOW BODY DESIGN**

distance and forgiveness come to life using a hollow body construction, a thin forged PWRShell face, and 65g of tungsten.

The KING TEC Hybrid features a refined shape, H.O.T. Face Technology, and adjustable weighting and loft to deliver ultimate versatility in a better player hybrid.

**H.O.T. FACE TECHNOLOGY**

A H.O.T. Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

**PWRSHELL FACE DESIGN**

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

**LIGHTWEIGHT CARBON CROWN**

A carbon crown allows more discretionary weight to be positioned within the clubhead to enhance speed and forgiveness.

**ADJUSTABLE WEIGHTING SYSTEM**

Two 12g heavy weights can be positioned in the toe, heel and front to fine tune trajectory and spin performance. Heavier 14g and lighter 10g weights are available in custom to allow for +4g and -4g in weight adjustment.

\*Custom only

A new face milling pattern and SNAKEBITE grooves maximize spin control in both dry and wet conditions.

**SNAKEBITE GROOVE TECHNOLOGY**

An ultra precise CNC milled groove uses sharper edges and a larger groove volume to deliver maximum spin.

**UPDATED FACE MILLING PATTERN**

A new face milling pattern produces 50% more spin in wet conditions than the previous generation wedge.

**FULL FACE GROOVES (56, 58, 60)**

Full face grooves on the 56, 58, and 60 degree lofts provides maximum spin performance on shots with an open face.

**3 GRINDS: VERSATILE, CLASSIC, WIDELOW**

The "versatile" grind features toe, heel and trailing edge relief, the "classic" grind features a progressive sole width from heel to toe, and the "widelow" grind features a wide sole with reduced bounce.

**PROGRESSIVE NOTCH DESIGN**

A notch design enhances versatility by enabling the leading edge to sit flush with the turf on open shots. The notch is center-aligned on the 48-56 degree lofts and more heelward on the 58-60 degree lofts.

IRON COMPARISON

HANDICAP RANGE

HANDICAP RANGE

**AIRX**

**LIGHTER. FASTER. EASIER.**

AIR-X is our lightest weight product line suited for players with smoother swing tempos. A lightweight design enables easier speed creation to produce as much distance as possible, regardless of your age, strength, and swing mechanics.

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X driver is designed to help golfers with smooth tempos generate increased club speed and distance.

**LIGHTWEIGHT DESIGN**

The combination of a lighter head, shaft, and grip encourages faster club speed.

**H.O.T. FACE TECHNOLOGY**

An A.I. designed variable thickness pattern increases forgiveness across the face.

**DRAW-BIASED WEIGHTING**

Weight is concentrated in the heel area to promote a draw-biased ball flight.

**OFFSET DESIGN**

An offset design provides maximum slice correction for a straighter ball flight.

**AVAILABLE IN STRAIGHT NECK**

A straight neck offering with no offset is available to those that prefer a traditional setup.

\*Custom only

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X hybrid is designed to help golfers with smooth tempos generate increased club speed and distance.

**LIGHTWEIGHT DESIGN**  
Using a lighter head, shaft and grip makes the club feel significantly lighter enabling faster clubhead speed without having to swing harder.

**H.O.T. FACE TECHNOLOGY**  
An A.I. designed variable thickness pattern increases forgiveness across the face.

**HEEL WEIGHTING**  
We positioned as much weight as possible in the heel of the club to make it easier to turn the club over for a straighter ball flight.

**OFFSET DESIGN**  
An offset hosel helps to eliminate a slice and promotes a straighter ball flight.

\*Custom only

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X women's driver is designed to help golfers with smooth tempos generate increased club speed and distance.

**LIGHTWEIGHT DESIGN**

The combination of a lighter head, shaft, and grip encourages faster club speed.

**H.O.T. FACE TECHNOLOGY**

An A.I. designed variable thickness pattern increases forgiveness across the face.

**DRAW-BIASED WEIGHTING**

Weight is concentrated in the heel area to promote a draw-biased ball flight.

**OFFSET DESIGN**

An offset design provides maximum slice correction for a straighter ball flight.

\*Custom only

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X women's hybrid is designed to help golfers with smooth tempos generate increased club speed and distance.

**LIGHTWEIGHT DESIGN**

Using a lighter head, shaft and grip makes the club feel significantly lighter enabling faster clubhead speed without having to swing harder.

**H.O.T. FACE TECHNOLOGY**

An A.I. designed variable thickness pattern increases forgiveness across the face.

**HEEL WEIGHTING**

We positioned as much weight as possible in the heel of the club to make it easier to turn the club over for a straighter ball flight.

**OFFSET DESIGN**

An offset hosel helps to eliminate a slice and promotes a straighter ball flight.

The T-Rail combo set features a traditional hybrid shape blended with 6 hybrid-irons. The unique setup enables golfers to enjoy immediate improvement in launch, distance and consistency without having to make any adjustments to their swing.

**H.O.T. FACE TECHNOLOGY**

H.O.T. Face Technology uses artificial intelligence to design a variable thickness pattern that delivers more efficient speed and spin across the face.

**HOLLOW CONSTRUCTION**

A hollow design through the set gives every club the super power of hybrid-like launch and distance.

**BAFFLER RAILS**

Baffle Rails allow the club to glide effortlessly through any turf condition, making a great shot outcome always possible.

**4 HYBRID IN THE SET**

A 4-hybrid launches higher and is more forgiving than a 4-iron, making longer approach shots not just easier, but much more consistent.

## COBRA PUTTERS

### 3D PRINTED

The COBRA 3D PRINTED line is constructed for those seeking ultimate stability. Featuring high MOI designs that consist of three shapes: oversized blade (GRANDSPORT), oversized fang (SUPERNOVA) and our showcase mallet design (AGERA). Each model is available with select hosel configurations to fit your ideal stroke type. When next level stability is packaged with LA GOLF DESCENDING LOFT TECHNOLOGY, you will get launch consistency from stroke to stroke, with unparalleled end-over-end roll performance in the game.

### Vintage

The COBRA VINTAGE family blends classic designs with modern performance. Four classic shapes ranging from a blade (SPORT), an oversize blade (WIDESPOT), fang (NOVA) and oversized mallets (STINGRAY & CUDA). Created from a piece of MIM'd 304SS, brings consistency and accuracy while highlighting milled surfaces for enhanced appeal. Each putter features a new PEBAX insert that gives a soft and responsive feel while delivering unmatched roll performance with LA GOLF DESCENDING LOFT TECHNOLOGY.

### LA GOLF DESCENDING LOFT TECHNOLOGY

COBRA has licensed LA GOLF's patented DESCENDING LOFT TECHNOLOGY. Features four surface planes (4°, 3°, 2°, 1°) that mitigate the delofting or the addition of loft during head delivery at impact and provides consistent launch from putt-to-putt.

### TRUER AND MORE CONSISTENT ROLL

DLT™ is designed to produce a consistent 1.5 degree launch angle regardless of how much shaft lean, attack angle, and whether the ball comes in contact on the higher or lower portion of the face.

The COBRA GRANDSPORT-35 putter is a multi-material 3D printed construction that brings ultimate stability in a blade. Featuring a plumbers neck hosel, designed for players with a moderate arc stroke type. Paired with LA GOLF's Descending Loft Technology that delivers consistent launch and unmatched end-over-end roll performance in the market.

**MULTI-MATERIAL CONSTRUCTION**  
An oversize blade shape combines a 3D printed nylon lattice cartridge-4g, a 304 stainless steel MIM frame-302g and a 3g carbon fiber crown that creates the ultimate design for stability.

**3D PRINTED NYLON CARTRIDGE**  
An intricate 3D printed nylon lattice cartridge optimizes weight savings allowing CG to sit low and forward to optimize energy transfer and stability.

**LA GOLF'S DESCENDING LOFT TECHNOLOGY**  
Featuring a 6061-aerospace grade aluminum insert with LA GOLF's proprietary Descending Loft Technology, utilizes 4 descending lofts (4°, 3°, 2°, 1°) to mitigate delofting and the addition of loft through head delivery during impact and provides an optimal launch for unparalleled end-over-end roll performance.

**ADJUSTABLE WEIGHTING SYSTEM**  
Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 15g weights and can move +- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20, 25g)

\*Custom only

The COBRA GRANDSPORT-Armlock putter is a multi-material 3D printed construction that brings ultimate stability in a blade. Featuring a plumbers neck hosel, designed for players with a moderate arc stroke type and seeking a longer armlock shaft setup. Paired with LA GOLF's Descending Loft Face Technology that delivers consistent launch and unmatched end-over-end roll performance in the market.

**\* ARMLOCK DESIGN**  
An armlock setup increases consistency by eliminating any variations in shaft angle through the putting stroke. A longer length and an oversize grip allows the user to rest the grip and shaft against their lead forearm for maximum stability.

**MULTI-MATERIAL CONSTRUCTION**  
An oversize blade shape combines a 3D printed nylon lattice cartridge-4g, a 304 stainless steel MIM frame-302g and a 3g carbon fiber crown that creates the ultimate design for stability.

An intricate 3D printed nylon lattice cartridge optimizes weight savings allowing CG to sit low and forward to optimize energy transfer and stability.

**LA GOLF'S DESCENDING LOFT TECHNOLOGY**

Featuring a 6061-aerospace grade aluminum insert with LA GOLF's proprietary Descending Loft Technology, utilizes 4 descending lofts (4°,3°,2°,1°) to mitigate delofting and the addition of loft through head delivery during impact and provides an optimal launch for unparalleled end-over-end roll performance.

**ADJUSTABLE WEIGHTING SYSTEM**

Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 15g weights and can move +- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20, 25g)

# cobra FLY-XL

## MEN'S SET

The Cobra FLY-XL complete set includes a full bag of lightweight and forgiving clubs that deliver easy launch and distance.

Black/Blue

### DRIVER

A titanium driver (10.5\* in reg, and 11.5\* in lite flex) has an oversized shape and heel-biased weighting for longer straighter drives.

### FAIRWAY

A 3-wood and 5-wood feature a shallow profile and heel biased weighting for accuracy and distance off the tee and from the fairway.

### HYBRIDS

A 4 and 5 hybrid create perfect gapping between the fairways and irons for longer approach shots into greens.

### IRONS

The irons (6-PW, SW) have a traditional cavity back design and perimeter weighting for effortless launch and distance.

### BLADE PUTTER

A premium blade putter design features a machined face for exceptional feel and control on long and short putts.

### PREMIUM CART BAG

To tie the set together, a premium bag features a 14-way top, a velour valuables pocket, and 7 zippered compartments.
