DRIVERS

DS-ADAPT DRIVER TECHNOLOGY

MORE EXTREME AERO DESIGN

An improved aero shape features a higher crown peak, and a more streamlined shape with smoother curvatures for further drag reduction and maximized speed.

TOUR INSPIRED SHAPING

A refined clubhead shape features a reduced visual footprint at address that promotes workability and control.

NEW INTERNAL ADAPTIVE WEIGHTING SYSTEM

A re-engineered PWR-BRIDGE weight (in the 9.0 driver) is shaped with a slight curvature to position the CG lower and more forward to reduce spin for increased speed creation.

MAX WORKABILITY WITH ADDED FORGIVENESS

Adjustable heel and toe weights are complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

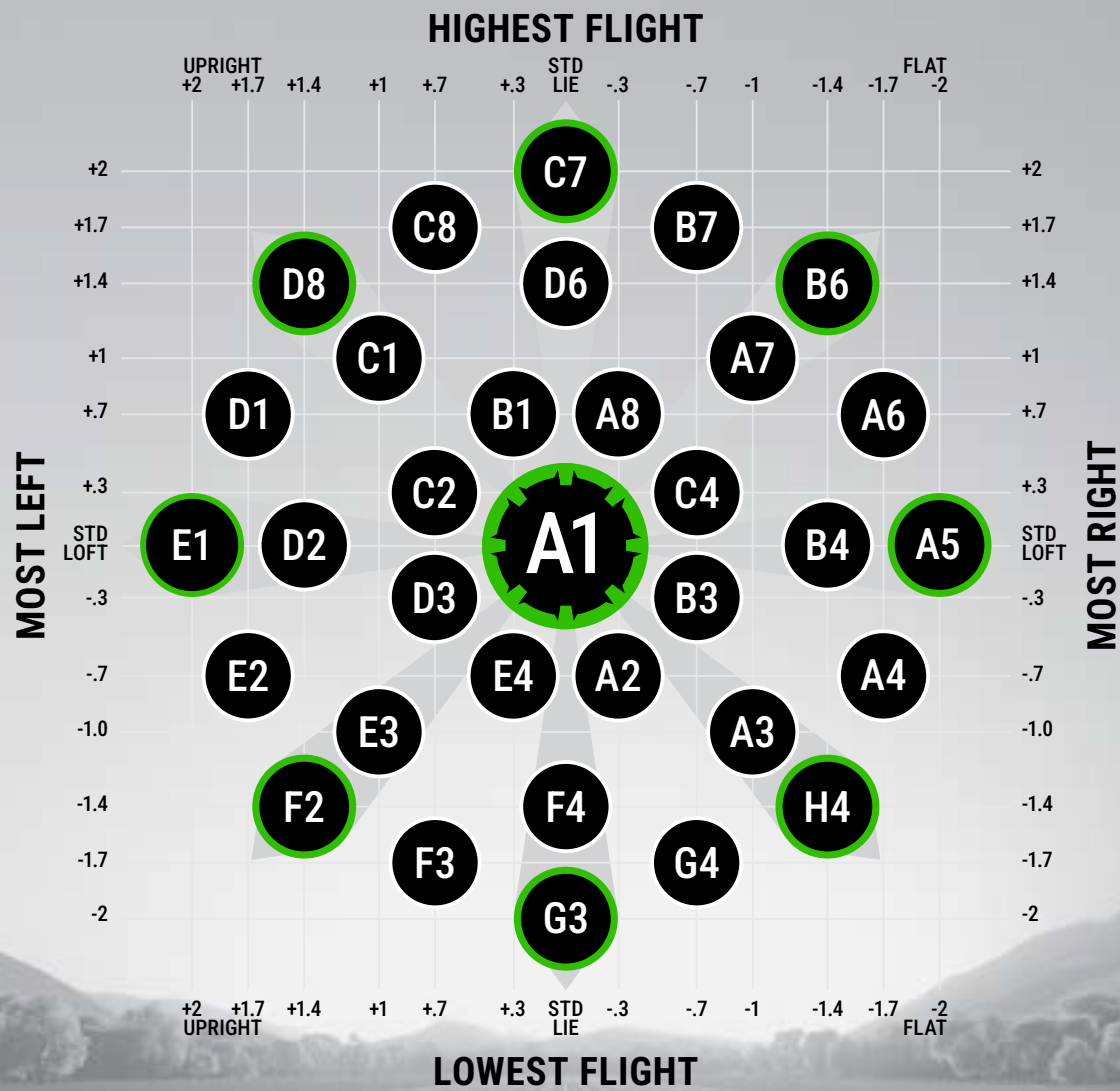

LARGER H.O.T. FACE INSERT

A larger forged face insert with H.O.T. face technology delivers improved face flex for more robust distance and ball speeds

FUTUREFIT33

The new FutureFit33 system features 33 unique loft & lie settings to unlock more customization options than ever before. For the first time, loft & lie can be adjusted ± 2 degrees independently from each other, allowing for more fine-tuned fitting customization.

Scan to unlock your best golf with our
fastest and most fittable driver

FUTUREFIT33

The LS model features a Tour inspired shape for better players that demand low spin and low launch for maximum workability and control.

NEW FUTUREFIT33 ADJUSTABLE HOSEL

The FutureFit33 system features 33 unique loft & lie settings to unlock more customization options than ever before. For the first time, loft & lie can be adjusted +/- 2 degrees independently from each other, allowing for more fine-tuned fitting customization. The innovative SMARTPAD design enables the face angle to remain square regardless of the setting.

MORE EXTREME AERO DESIGN

MORE EXTREME AERO DESIGN

An improved aero shape features a higher crown peak, and a more streamlined shape with smoother curvatures for further drag reduction and maximized speed.

SHAPED FOR SPEED AND FORGIVENESS

A refined clubhead shape blends speed with forgiveness for an elevated look at address that inspires maximum confidence on the tee.

NEW ADAPTIVE WEIGHTING SYSTEM

The MAX-K model achieves a combined 10,000 MOI (in the 9.0* & 10.5*; the 12.0* features a total of 9800 combined MOI) using an external fixed back weight and internal back weight pad to position the CG as low and back as possible to drive MOI to the extreme. The result is our most stable and forgiving head.

LARGER H.O.T. FACE INSERT

A larger forged face insert with H.O.T. face technology delivers improved face flex for more robust distance and ball speeds.

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X driver is designed to help golfers with smooth tempos generate increased club speed and distance.

LIGHTWEIGHT DESIGN

The combination of a lighter head, shaft, and grip encourages faster club speed.

H.O.T. FACE TECHNOLOGY

An A.I. designed variable thickness pattern increases forgiveness across the face.

DRAW-BIASED WEIGHTING

Weight is concentrated in the heel area to promote a draw-biased ball flight.

OFFSET DESIGN

An offset design provides maximum slice correction for a straighter ball flight.

AVAILABLE IN STRAIGHT NECK

A straight neck offering with no offset is available to those that prefer a traditional setup.

DS-ADAPT FAIRWAY TECHNOLOGY

MAX WORKABILITY WITH ADDED FORGIVENESS

Adjustable heel and toe weights are complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

TITANIUM CONSTRUCTION

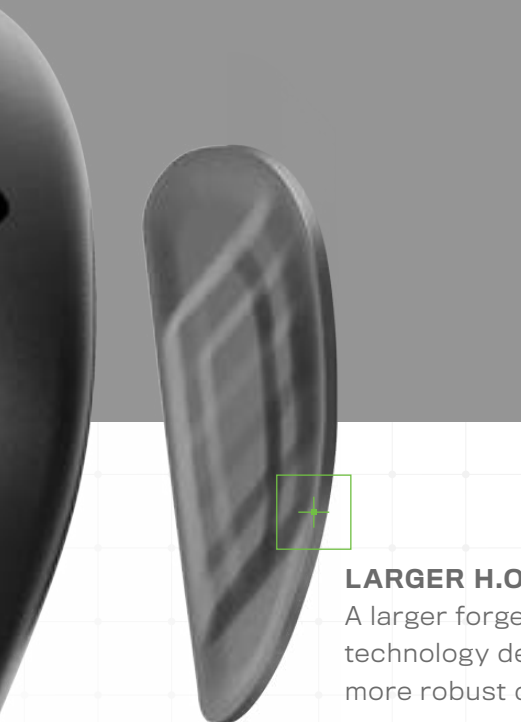

A multi-material construction blends a lightweight 8-1-1 Titanium body and face, and a carbon crown to improve weight distribution for maximum distance.

TIGHTER DISPERSION WITH TUNGSTEN WEIGHTING

Internal tungsten weights are strategically positioned in the heel and toe areas to improve stability for tighter dispersion and pinpoint accuracy.

LARGER H.O.T. FACE INSERT

A larger forged face insert with H.O.T. face technology delivers improved face flex for more robust distance and ball speeds.

TOUR INSPIRED SHAPING

Subdued clubhead styling inspires a Tour-validated look and feel at address.

NEW FUTUREFIT33 ADJUSTABLE HOSEL

The FutureFit33 system features 33 unique loft & lie settings to unlock more customization options than ever before. For the first time, loft & lie can be adjusted ± 2 degrees independently from each other, allowing for more fine-tuned fitting customization. The innovative SMARTPAD design enables the face angle to remain square regardless of the setting.

The MAX Women's model features tunable draw-bias and unrivalled stability to inspire maximum confidence from the fairway or off the tee.

NEW FUTUREFIT33 ADJUSTABLE HOSEL

The FutureFit33 system features 33 unique loft & lie settings to unlock more customization options than ever before. For the first time, loft & lie can be adjusted +/- 2 degrees independently from each other, allowing for more fine-tuned fitting customization. The innovative SMARTPAD design enables the face angle to remain square regardless of the setting.

NEW INTERNAL ADAPTIVE WEIGHTING SYSTEM

The MAX model features an internal weight pad positioned in the back/heel area to create the optimal combination of stability with maximum draw bias.

LARGER H.O.T. FACE INSERT

A larger forged face insert with H.O.T. face technology delivers improved face flex for more robust distance and ball speeds.

MAX FORGIVENESS & DRAW-BIASED CONTROL

Adjustable back and heel weight positioning allows you to fine-tune draw bias in our most forgiving head.

TIGHTER DISPERSION

A lightweight carbon crown improves weight distribution to position the CG lower and further back, creating a more playable clubhead.

The new KING TEC Hybrid features a refined shape, all new FutureFit33 adjustable loft & lie system, H.O.T. Face Technology, and adjustable weighting and loft to deliver ultimate versatility in a better player hybrid.

REFINED BETTER PLAYER SHAPING

A refined shape features a smaller address profile that inspires more workability and precision for better players to attack greens.

H.O.T. FACE TECHNOLOGY

A H.O.T. Face design uses 15 unique hot spots on the face to deliver more efficient speed and spin across the face.

PWRSHELL FACE DESIGN

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

LIGHTWEIGHT CARBON CROWN

A carbon crown allows more discretionary weight to be positioned within the clubhead to enhance speed and forgiveness.

ADJUSTABLE WEIGHTING SYSTEM

Two 12g heavy weights can be positioned in the toe or heel to fine tune trajectory and spin performance. Heavier and lighter weights are available in custom to allow for further weight adjustment.

The new KING TEC ONE Length Hybrid features a refined shape, all new FutureFit33 adjustable loft & lie system, H.O.T. Face Technology, and a short ONE Length configuration at 37.25" to deliver unmatched consistency and accuracy.

MORE CONSISTENCY WITH ONE LENGTH

ONE Length is designed to simplify your game so you can be more confident, and more consist from every distance to the pin. Each TEC ONE Length hybrid is built to 7-iron length, allowing golfers to use one repeatable setup and swing for every club. Arccos users have increased their GIR (Greens In Regulation) percentage by an average of 40% when they switched from variable length irons to ONE Length irons.

CONFIDENCE-INSPIRING SHAPE

A refined shape features a slightly larger address profile than the variable length KING TEC hybrid (shaping is comparable to DS-Adapt) that inspires more confidence for better players seeking forgiveness and accuracy.

H.O.T. FACE TECHNOLOGY

A H.O.T. Face design uses 15 unique hot spots on the face to deliver more efficient speed and spin across the face.

PWRSHELL FACE DESIGN

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

LIGHTWEIGHT CARBON CROWN

A carbon crown allows more discretionary weight to be positioned within the clubhead to enhance speed and forgiveness.

LOW, BACK CG WEIGHTING SYSTEM

A single 12g heavy weight positions the CG low and back to promote high launch and enhanced stability.

IRONS

DS-ADAPT *IRON TECHNOLOGY*

SPEEDSHELL FACE INSERT WITH H.O.T. FACE TECH

A re-engineered face insert is our largest to date, wrapping further around the toe and sole area. A larger insert paired with H.O.T. Face technology delivers 23% more face flex than the previous generation DARKSPEED irons, unlocking faster speed, higher launch and even more distance.

HOLLOW BODY CONSTRUCTION

Taking inspiration from a metalwood design, a hollow body construction in every iron improves weight distribution and creates a more unsupported face to unlock maximum distance potential.

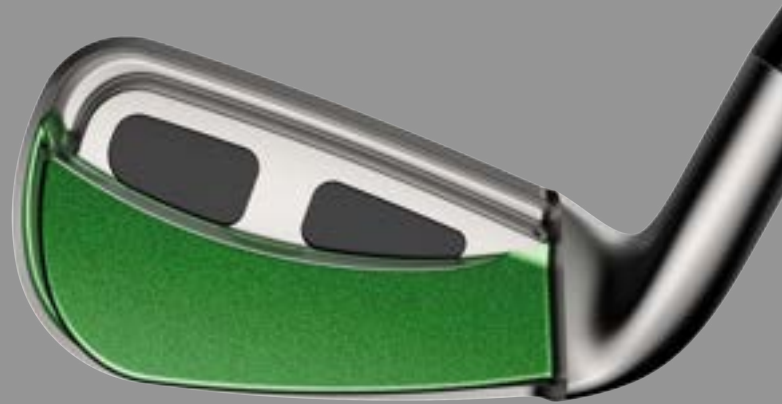

TUNED ACOUSTICS AND FEEL

The hollow cavity is filled with a soft foam that damps vibrations for exceptional sound and feel.

**NEW INTERNAL ADAPTIVE
WEIGHTING SYSTEM**

A re-engineered PWR-BRIDGE weight positions the CG lower for improved energy transfer and higher launch resulting in more playable distance.

Unlock your distance potential with our largest SPEEDSHELL face insert, hollow construction, and re-engineered adaptive PWR-BRIDGE weighting that delivers our longest and most robust iron design yet.

SPEEDSHELL FACE INSERT WITH H.O.T. FACE TECH

The MAX women's iron features our largest SPEEDSHELL face insert, hollow construction, and re-engineered adaptive PWR-BRIDGE weighting that delivers our longest and most robust iron design yet. The design is tailored to optimize performance for women's swings, and features weaker lofts to promote easy launch, a slightly oversize profile for forgiveness, and a lightweight graphite shaft for effortless speed creation.

Free Arccos sensors with purchase

SPEEDSHELL FACE INSERT WITH H.O.T. FACE TECH

A re-engineered face insert is our largest to date, wrapping further around the toe and sole area. A larger insert paired with H.O.T. Face technology delivers 23% more face flex than the previous generation DARKSPEED irons, unlocking faster speed, higher launch and even more distance.

NEW INTERNAL ADAPTIVE WEIGHTING SYSTEM

A re-engineered PWR-BRIDGE weight positions the CG lower for improved energy transfer and higher launch resulting in more playable distance.

HOLLOW BODY CONSTRUCTION

Taking inspiration from a metalwood design, a hollow body construction in every iron improves weight distribution and creates a more unsupported face to unlock maximum distance potential.

TUNED ACOUSTICS AND FEEL

The hollow cavity is filled with a soft foam that damps vibrations for exceptional sound and feel.

The KING TEC-X Irons redefine how a game improvement iron should look and feel. Exhilarating distance and forgiveness are achieved through an internal 70g tungsten weight and hollow body construction, giving you the keys to improve your game while looking like a serious player.

PLAYERS GAME IMPROVEMENT SHAPING

Featuring a slightly larger profile than KING TEC, the X model is designed to inspire confidence in a more forgiving shape that delivers enhanced stability on off-center hits.

IMPROVED FEEL: HOLLOW CONSTRUCTION WITH SOFTER FOAM

A hollow body design is filled with a new foam that is lighter and softer to enhance feel and feedback.

INCREASED SPEED AND STABILITY: PWRSHELL H.O.T. FACE & TUNGSTEN WEIGHTING

Dynamic distance is unleashed using a hollow body, a thinner and more robust PWRSHELL insert with H.O.T. Face Technology, and 70g of tungsten in the toe for added stability.

The KING TEC-X ONE Length Irons redefine how a game improvement iron should look and feel. Exhilarating distance, forgiveness and consistency are achieved through an internal 70g tungsten weight, hollow body construction, and ONE Length configuration, giving you the keys to improve your game while looking like a serious player.

MORE CONSISTENCY WITH ONE LENGTH

ONE Length is designed to simplify your game so you can be more confident, and more consist from every distance to the pin. Each TEC-X ONE Length iron is built to 7-iron length, allowing golfers to use one repeatable setup and swing for every club. Arccos users have increased their GIR (Greens In Regulation) percentage by an average of 40% when they switched from variable length irons to ONE Length irons.

PLAYERS GAME IMPROVEMENT SHAPING

Featuring a slightly larger profile than KING TEC, the X model is designed to inspire confidence in a more forgiving shape that delivers enhanced stability on off-center hits.

IMPROVED FEEL: HOLLOW CONSTRUCTION WITH SOFTER FOAM

A 5-step forged construction, a compact tour cavity back shape, and a TPU insert deliver soft feel with excellent feedback that skilled players demand. Available in two color choices, nickel chrome and a new black DBM finish.

New DBM (Diamonized Black Metal)
Finish Available

Free Arccos sensors with purchase

NEW DBM (DIAMONIZED BLACK METAL) FINISH AVAILABLE

The most durable black finish on the market. 2x more wear resistant, 3x more corrosion & scratch resistant than nickel chrome finishes. The finish is chemically infused so there is no additional layer of thickness to the coating that affects groove performance like chrome finishes do.

ELEGANT SHAPING

A compact address profile inspires precision and workability with a touch of forgiveness provided by the cavity back design.

5-STEP FORGED

Crafted and 5-step forged from 1025 carbon steel for exceptional feel and compact shaping.

TPU INSERT FOR ENHANCED FEEL

A TPU insert behind the sweet spot creates a satisfying soft feel

ALUMINUM MEDALLION

An aluminium medallion enables better weight distribution for added forgiveness when you need it.

The KING 3D Printed TOUR irons utilize 3D printing technology to unlock a new realm of performance. Their one of a kind design features the most forgiving blade shape on the market, delivering the forgiveness that aspirational players need, and the sleek looks and soft feel that better players desire.

3D PRINTED STEEL CONSTRUCTION

Each iron is fully 3D printed from 316 stainless steel. 3D printing provides significant advantages over traditional methods of casting and forging, unlocking more design freedom and significant performance improvements.

FORGIVING PLAYERS BLADE SHAPE

3D printing has unlocked new design possibilities, enabling COBRA engineers to create a compact blade shape with the mass properties (high MOI, low CG) of a game improvement iron without sacrificing looks and soft feel that better players demand.

INTERNAL LATTICE STRUCTURE

COBRA took a muscle-back blade shape (similar in size and shape to the KING TOUR iron), and transformed the inside of the blade into a complex internal lattice structure to reduce the weight of the club by 33%. That discretionary weight was repositioned to optimize feel, CG position, and MOI.

EXTREME FORGIVENESS MEETS SOFT FEEL

The 3D printed internal lattice structure not only optimizes weight savings, but also provides the stiffness and strength to support the face and fine-tune the acoustics of each iron to produce the most appealing impact sound and feel.

TUNGSTEN WEIGHTING

The discretionary weight savings allowed for up to 100g of tungsten to be positioned low in the heel and toe resulting in the perfect blend of a compact blade shape with a low CG and high MOI that mirrors a game improvement iron.

The T-Rail combo set features a traditional hybrid shape blended with 6 hybrid-irons. The unique setup enables golfers to enjoy immediate improvement in launch, distance and consistency without having to make any adjustments to their swing.

H.O.T. FACE TECHNOLOGY

H.O.T. Face Technology uses artificial intelligence to design a variable thickness pattern that delivers more efficient speed and spin across the face.

BAFFLER RAILS

Baffler Rails allow the club to glide effortlessly through any turf condition, making a great shot outcome always possible.

HOLLOW CONSTRUCTION

A hollow design through the set gives every club the super power of hybrid-like launch and distance.

5 HYBRID IN THE SET

A 5-hybrid launches higher and is more forgiving than a 5-iron, making longer approach shots not just easier, but much more consistent.

HANDICAP RANGE

WEDGES

Crafted from 8620 steel using MIM (Metal Injection Molding), KING Wedges are one of the softest feelings in market. Choose from four new grinds (DROP, WIDELOW, VERSATILE, TOUR) for enhanced greenside creativity and optimized CG with Flight Window Technology (F.W.T.) for tour inspired launch. The redesigned Cobra Speed Notch, 67% larger than before, ensures better glide and speed on open-face shots.

MIM (METAL INJECTION MOLDING)

Experience precision with MIM technology, offering 50% tighter tolerances than traditional casted wedges. Each head is heat-treated to nearly 1400°C, ensuring a tighter grain structure for a softer feel and enhanced longevity, resisting groove degradation for lasting performance.

COBRA SPEED NOTCH

Discover the newly redesigned Cobra Speed Notch, featuring softer, blended shaping that complements our new grinds. Now 67% larger, it ensures smooth glide through the ground while maintaining speed and delivering high spinning shots.

GRINDS

KING Wedges feature four new grinds: DROP, WIDELOW, VERSATILE, and TOUR. Each designed to give golfers the versatility to tackle any shot they encounter on the course. Whether you need precision around the greens or maximum performance from the fairway, these new grinds ensure you have the right tool for every situation.

FLIGHT WINDOW TECHNOLOGY (F.W.T.)

Experience tour level performance with our Flight Window Technology. CG is placed strategically throughout the loft range to enhance dynamic loft while producing penetrating shots with maximum spin, giving you the ultimate edge on the course.

Take control of your short game with the KING-X Wedge. Its forgiving cavity back design provides enhanced confidence and consistency on every shot. Experience a blend of reliability and creativity from its progressive teardrop grind, making every shot precise and inspired. Play with confidence and master every challenge with the KING-X Wedge.

MIM (METAL INJECTION MOLDING)

Experience precision with MIM technology, offering 50% tighter tolerances than traditional casted wedges. Each head is heat-treated to nearly 1400°C, ensuring a tighter grain structure for a softer feel and enhanced longevity, resisting groove degradation for lasting performance.

HOLLOW DESIGN

Our innovative deep undercut design frees up 20 grams of weight to be strategically redistributed to the perimeter of the clubhead, significantly enhancing forgiveness. Greater stability promotes confidence and better performance on the course. Perfect for players looking to improve their game with a wedge that combines advanced technology with outstanding forgiveness.

TPU INSERT

Discover game-changing forgiveness and exceptional feel with our innovative hollow cavity back design. This advanced construction maximizes forgiveness on off-center hits. The strategically placed TPU insert enhances the soft, responsive feel at impact, giving you the confidence to tackle every short-game challenge.

PROGRESSIVE TEARDROP GRIND

This teardrop-shaped grind with a progressive blend of added camber, delivering exceptional forgiveness and versatility. Navigate every type of turf and bunker with ease, enjoying enhanced performance and control.

LA GOLF DESCENDING LOFT

CORTE

PUTTERS

The COBRA AGERA Counter-Balanced Putter. Crafted through a multi-material 3D printing process, it ensures unparalleled stability in the realm of oversized mallet designs. With a 38" shaft and a specially designed 17" counter-balanced grip, this putter not only enhances your distance control but also fosters a fluid and effortless stroke—making it the perfect choice for those seeking to master their tempo. Paired with LA GOLF’s revolutionary Descending Loft Face Technology, you can expect nothing less than consistent launch and an unrivalled end-over-end roll performance.

MULTI-MATERIAL CONSTRUCTION

An oversize mallet shape combines a 3D printed nylon lattice cartridge-17g, a 304 stainless steel MIM frame-283g and a 7g carbon fiber crown that creates the ultimate design for stability.

3D PRINTED NYLON CARTRIDGE

An intricate 3D printed nylon lattice cartridge optimizes weight savings allowing CG to sit low and forward to optimize energy transfer and stability.

LA GOLF’S DESCENDING LOFT TECHNOLOGY

New for 2025, a 304 stainless steel insert with LA GOLF’s proprietary Descending Loft Technology utilizes four descending lofts (4°, 3°, 2°, 1°) to mitigate de lofting and the addition of loft through head delivery at impact. This technology provides optimal launch for unparalleled end-over-end roll performance.

ADJUSTABLE WEIGHTING SYSTEM

Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 10g weights and can move +- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20, 25g)

3D PRINTED NYLON CARTRIDGE

An intricate 3D printed nylon lattice cartridge optimizes weight savings allowing CG to sit low and forward to optimize energy transfer and stability.

LA GOLF's DESCENDING LOFT TECHNOLOGY

Featuring a 6061-aerospace grade aluminium insert with LA GOLF's proprietary Descending Loft Technology, utilizes 4 descending lofts (4°,3°,2°,1°) to mitigate de lofting and the addition of loft through head delivery during impact and provides an optimal launch for unparalleled end-over-end roll performance.

ADJUSTABLE WEIGHTING SYSTEM

Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 15g weights and can move +- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20g, 25g)

TRACK YOUR GAME LIKE A PRO, WITH ARCCOS

Experience automatic shot tracking and access personalized, tour-level data such as strokes gained analytics and smart club distances. Arccos is filled with powerful yet simple features like A.I. rangefinder and personal caddie advice to help golfers play smarter and shoot lower scores. On average, new members improve by 5.71 strokes within their first year. With the purchase of any COBRA club, you are eligible to try Arccos for free.

ARCCOS FEATURES

Arccos leverages your personal shot history, wind speed and direction, elevation changes, and more to help players make smarter decisions on the course and improve faster.

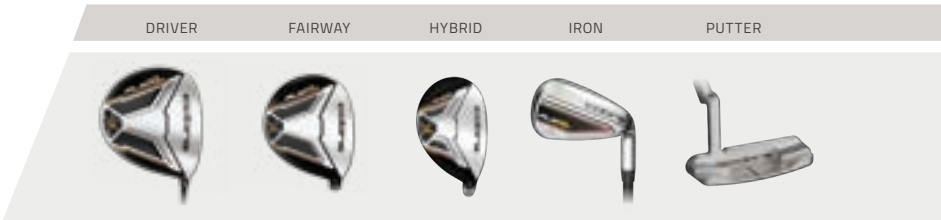

COMPLETE SETS

MEN'S SET

The 2024 Cobra FLY-XL complete set includes a full bag of lightweight and forgiving clubs that deliver easy launch and distance.

Black/Gold Fusion

- DRIVER**

A titanium driver (10.5* in reg, and 11.5* in lite flex) has an oversized shape and heel-biased weighting for longer straighter drives.
- FAIRWAY**

A 3-wood features a shallow profile and heel biased weighting for accuracy and distance off the tee and from the fairway.
- HYBRIDS**

A 4 and 5 hybrid create perfect gapping between the fairways and irons for longer approach shots into greens.
- IRONS**

The irons (6-PW, SW) have a traditional cavity back design and perimeter weighting for effortless launch and distance.
- BLADE PUTTER**

A premium blade putter design features a machined face for exceptional feel and control on long and short putts.
- PREMIUM CART BAG**

To tie the set together, a premium bag features a 14-way top, a velour valuables pocket, and 7 zippered compartments.
