DOING THINGS DIFFERENTLY™

We are COBRA® Golf.

You may know us as the brand that's "Doing Things Differently™." But, differently only matters when it's better. We like to have fun, yes,...but this company was born from a fundamental belief that there is always a better way waiting to be discovered, there is always a NEXT waiting to be revealed.

Bold talk, sure, but we believe that bold thought requires bolder action: saying it is easy, putting in the work, doing more than what's expected, and pushing further still is the only way that true innovation happens. That is where different leads to better.

Different also gives way to "firsts": Whether its the first company to invent the utility club, to build clubs with graphite shafts, to mass-produce ONE-length irons or clubs with Smart technology. We lead our industry in sourcing materials, new shapes and new processes, all in the name of better.

At COBRA®, our approach will always be different -

BUT, WAIT TILL YOU SEE WHAT DIFFERENT DOES NEXT.
WE ARE COBRA® GOLF AND WE ARE BREAKING THROUGH.

Here's to Doing Things Differently™.

AEROJET™

DRIVER TECHNOLOGY

The AEROJET drivers ignite a new era in speed through advanced aerodynamic shaping. Boasting the lowest drag coefficient of any Cobra driver design, the AEROJET LS model uses an aggressive streamlined shape to enable the fastest clubhead speed possible.

AERODYNAMIC SHAPING

Across all three driver models, a seamless aerodynamic design is adapted to deliver faster clubhead speed for maximized distance.

▶ PWR-BRIDGE WEIGHTING

An innovative suspended bridge weight design enables unrestricted flexibility of the face and sole, and positions the CG low and forward to unleash faster ball speed.

▶ PWRSHELL WITH H.O.T FACE

A forged PWRSHELL face insert maximizes flexibility for faster ball speed and higher launch. A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

▶ THREE MODELS

AEROJET LS

Aggressive aero shaping in a low spin design maximizes speed for skilled players with fast swing speeds.

AEROJET

A stable aerodynamic shape delivers speed with increased forgiveness to fit a wide range of players.

AEROJET MAX

Blends the forgiveness and speed of AEROJET into a draw-biased design with a heel weight option for better slice correction.

The Aerojet LS utilizes an advanced aerodynamic design to enable the fastest club speed possible.

AERODYNAMIC SHAPING

A seamless aerodynamic design is adapted to deliver faster clubhead speed for maximized distance.

PWR-BRIDGE WEIGHTING

An innovative suspended bridge weight design enables unrestricted flexibility of the face and sole, and positions the CG low and forward to unleash faster ball speed.

PWRSHELL WITH H.O.T FACE

A forged PWRSHELL face insert maximizes flexibility for faster ball speed and higher launch. A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

ADJUSTABLE WEIGHTING

Two adjustable weight settings in the heel and toe allow for a neutral or fade-biased ball flight.

CARBON CROWN AND SOLE

A carbon fiber crown and sole create a lighter and stronger chassis

Free Arccos sensors with purchase

LAUNCH

SPIN

AEROJET™

FAIRWAY / HYBRID TECHNOLOGY

The AEROJET fairways and hybrids utilize PWR-BRIDGE and PWRSHELL with H.O.T face to deliver powerful distance and effortless launch to enable more confidence on longer approach shots.

▶ PWR-BRIDGE WEIGHTING

An innovative suspended bridge weight design enables unrestricted flexibility of the face and sole, and positions the CG low and forward to unleash faster ball speed.

▶ PWRSHELL FACE DESIGN

For the first time in our fairways, a forged PWRSHELL face insert is used to maximize flexibility for faster ball speed and higher launch.

▶ H.O.T FACE TECHNOLOGY

A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face so every shot flies a maximum distance.

AEROJET-LS™

FAIRWAY

The Aerojet LS fairway is designed for skilled players seeking a lower and more workable trajectory.

PWR-BRIDGE WEIGHTING

An innovative suspended bridge weight design enables unrestricted flexibility of the face and sole, and positions the CG low and forward to unleash faster ball speed.

PWRSHELL WITH H.O.T FACE

A forged PWRSHELL face insert maximizes flexibility for faster ball speed and higher launch. A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

ADJUSTABLE WEIGHTING

Two adjustable weight settings in the heel and toe allow for a neutral or fade-biased ball flight.

CARBON FIBER CROWN

A carbon crown enables a lower CG for higher launch and added forgiveness.

ADJUSTABLE LOFT

An adjustable loft sleeve offers fine tuning of trajectory and spin. Each loft is adjustable up to +/- 1.5 from the printed loft on the head.

The Aerojet hybrid is a versatile hybrid that blends distance with high launch to provide more forgiveness on longer approach shots.

PWR-BRIDGE WEIGHTING

An innovative suspended bridge weight design enables unrestricted flexibility of the face and sole, and positions the CG low and forward to unleash faster ball speed.

PWRSHELL FACE DESIGN

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

H.O.T FACE TECHNOLOGY

A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

AEROJET™

IRON TECHNOLOGY

The Aerojet irons are more advanced on every level. A sleek and sophisticated silhouette combines with premium technologies to elevate your game.

▶ PWR-BRIDGE WEIGHTING

An innovative floating weight design enables 30% more face flexion to deliver untethered distance. The weight is suspended in a soft polymer filler to tune acoustics and feel.

▶ PWRSHELL FACE DESIGN

A forged PWRShell face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

▶ H.O.T FACE TECHNOLOGY

A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face so every shot flies a maximum distance.

KING[®] IRONS

Crafted for the blade aficionados, the traditionalists, and those that aspire for nothing but the best ball striking experience possible.

5-STEP FORGED

Crafted and 5-step forged from 1025 carbon steel for exceptional feel and compact shaping

TOUR INSPIRED SHAPING

Using Tour feedback, the design has been refined to deliver sleek muscle back and cavity back shapes that inspires precision and workability.

FLOW SET

Available in a combo set that flows from a more forgiving muscle cavity back in the 4-6 iron, to a more workable muscle back in the 7 through pitching wedge. Full sets of MB and CB available in custom.

The Forged TEC ONE Length Irons deliver enhanced consistency and accuracy for better players.

ONE LENGTH CONFIGURATION

ONE Length delivers improved consistency and accuracy by encouraging one repeatable setup, ball position, and swing for every iron.

REFINED SHAPING

Experience unrivaled ball-striking through a sleeker and refined shape featuring a thinner topline and reduced offset that inspires precision and playability.

ENHANCED FEEL THROUGH FORGING & FOAM TECH

Each iron is crafted from 1025 carbon steel and precision-forged 5 times to deliver soft, player-preferred feel. A hollow body design is filled with a lightweight foam that enhances feel and feedback.

FORGIVING HOLLOW BODY DESIGN

Dynamic distance is unleashed using a hollow body, thinner PWRSHELL Face, and 20g of tungsten for added stability.

The new 2023 KING TEC Hybrid features a refined shape, H.O.T Face Technology, and adjustable weighting and loft to deliver ultimate versatility in a better player hybrid.

H.O.T FACE TECHNOLOGY

A H.O.T Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

PWRSHELL FACE DESIGN

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

LIGHTWEIGHT CARBON CROWN

A carbon crown allows more discretionary weight to be positioned within the clubhead to enhance speed and forgiveness.

ADJUSTABLE WEIGHTING SYSTEM

Two 12g heavy weights can be positioned in the toe, heel and front to fine tune trajectory and spin performance. Heavier 14g and lighter 10g weights are available in custom to allow for +4g and -4g in weight adjustment.

IRON COMPARISON

HANDICAP RANGE

HANDICAP RANGE

WEDGES

SLAKEBITE WEDGE

A new face milling pattern and SNAKEBITE grooves maximize spin control in both dry and wet conditions.

SNAKEBITE GROOVE TECHNOLOGY

An ultra precise CNC milled groove uses sharper edges and a larger groove volume to deliver maximum spin.

FULL FACE GROOVES (56, 58, 60)

Full face grooves on the 56, 58, and 60 degree lofts provides maximum spin performance on shots with an open face.

3 GRINDS: VERSATILE, CLASSIC, WIDELOW

The "versatile" grind features toe, heel and trailing edge relief, the "classic" grind features a progressive sole width from heel to toe, and the "widelow" grind features a wide sole with reduced bounce.

PROGRESSIVE NOTCH DESIGN

A notch design enhances versatility by enabling the leading edge to sit flush with the turf on open shots. The notch is center-aligned on the 48-56 degree lofts and more heelward on the 58-60 degree lofts.

RRP: € 169,00

SLAKEBITE-X WEDGE

A forgiving cavity back design enables you to step up your short game and play every specialty shot with more confidence.

SNAKEBITE GROOVE TECHNOLOGY

An ultra precise CNC milled groove uses sharper edges and a larger groove volume to deliver maximum spin.

HOLLOW DESIGN

An oversized hollow cavity back design provides extreme forgiveness and versatility

TPU INSERT

A TPU insert behind the sweet spot provides a cushiony feel on every swing.

UPDATED FACE MILLING PATTERN

A new face milling pattern produces 50% more spin in wet conditions than the previous generation wedge.

TEARDROP GRIND

A new teardrop shaped grind provides forgiveness and versatility out of every type of turf and bunker

FULL FACE GROOVES

Full face grooves in each loft provide consistent spin across the face.

SUPER GAME
IMPROVEMENT

The T-Rail combo set features a traditional hybrid shape blended with 6 hybrid-irons. The unique setup enables golfers to enjoy immediate improvement in launch, distance and consistency without having to make any adjustments to their swing.

H.O.T FACE TECHNOLOGY

H.O.T Face Technology uses artificial intelligence to design a variable thickness pattern that delivers more efficient speed and spin across the face.

HOLLOW CONSTRUCTION

A hollow design through the set gives every club the super power of hybrid-like launch and distance.

BAFFLER RAILS

Baffler Rails allow the club to glide effortlessly through any turf condition, making a great shot outcome always possible.

4 HYBRID IN THE SET

A 4-hybrid launches higher and is more forgiving than a 4-iron, making longer approach shots not just easier, but much more consistent.

RRP: € 949,00

AIR-X

LIGHTER. FASTER. EASIER.

The AIR-X products are designed for the beginner to avid golfers with the smoothest swing tempos. Each club is crafted using lightweight components (head, shaft, and grip) to make every swing feel effortless.

▶ OUR LIGHTEST CLUBS GOT EVEN LIGHTER

Weighting just 277 grams, the AIR-X driver is up to 50 grams lighter than traditional drivers. For swing speeds under 90 mph, the lighter weight feels great, helps with delivery timing, and creates a sensation of effortless speed and control. For added forgiveness, the clubs use a blend of offset and heel weighting to help these golfers stay on their intended target line.

▶ CARBON FIBER CROWN

Using a lighter carbon fiber material, we were able to remove an additional 2 grams of weight from the head.

▶ HEEL-BIASED WEIGHTING

Weight positioned in the heel helps square the clubface quicker at impact for straighter and more controlled drives. An offset hosel adds draw bias and increases dynamic launch.

▶ LIGHTWEIGHT SHAFT & GRIP

A sub 50g shaft (48g cut weight) and a 6 gram lighter 37g grip saves 4 grams from the overall club weight and lowers the balance point closer to the head to maintain a proper swing weight.

The AIR-X driver features a lightweight design to promote great feel, and effortless speed for the smoothest swing tempos.

LIGHTWEIGHT DESIGN

Using a lighter head, shaft (48g) and grip (37g) makes the club feel significantly lighter and easier to swing compared to a traditional driver.

CARBON CROWN

Using a lighter carbon crown material, we were able to remove an additional 2 grams of weight from the head.

BACK/HEEL WEIGHTING

Weight is localized in the back and heel to create stability on off center hits with draw bias for those that need it.

OFFSET DESIGN

In addition to heel weighting, a new hosel design with 20% more offset helps to further eliminate a golfers' slice so they can find more fairways.

ALSO AVAILABLE IN STRAIGHT NECK

For those who prefer a traditional look at address with no offset, a straight-neck version is also available.

RRP: € 369,00

*Custom only

The AIR-X Women's driver features a lightweight design to promote great feel, and effortless speed for the smoothest swing tempos.

LIGHTWEIGHT DESIGN
Using a lighter head, shaft (48g) and grip (37g) makes the club feel significantly lighter and easier to swing compared to a traditional driver.

CARBON CROWN
Using a lighter carbon crown material, we were able to remove an additional 2 grams of weight from the head.

BACK/HEEL WEIGHTING
Weight is localized in the back and heel to create stability on off center hits with draw bias for those that need it.

OFFSET DESIGN
In addition to heel weighting, a new hosel design with 20% more offset helps to further eliminate a golfers' slice so they can find more fairways.

ALSO AVAILABLE IN STRAIGHT NECK
For those who prefer a traditional look at address with no offset, a straight-neck version is also available.

RRP: € 369,00

The AIR-X Women's hybrid features a lightweight design to promote great feel, and effortless speed for the smoothest swing tempos.

LIGHTWEIGHT DESIGN
Using a lighter head, shaft (48g) and grip (41g) makes the club feel significantly lighter and easier to swing compared to a traditional hybrid.

FORGED FACE INSERT
A thin forged face insert enhances ball speed for smoother tempo swings.

BACK/HEEL WEIGHTING
Weight is localized in the back and heel to create stability on off center hits with draw bias for those that need it.

OFFSET DESIGN
An offset hosel helps to eliminate a golfers' slice so they can hit straighter and more accurate shots.

RRP: € 219,00

The AIR-X Women's irons feature a lightweight design to promote great feel, and effortless speed for the smoothest swing tempos.

LIGHTWEIGHT DESIGN
Using a lighter head, shaft (48g) and grip (41g) makes the club feel significantly lighter and easier to swing compared to a traditional iron.

VARIABLE THICKNESS FACE
A variable thickness face design is thinner in the heel and toe to promote more speed on off-center hits.

LOW PROFILE DESIGN
A low profile, cavity back design with greater lofts will help golfers launch it higher and longer, effortlessly.

OFFSET DESIGN
An offset hosel helps to eliminate a golfers' slice so they can hit straighter and more accurate shots.

▶ STAINLESS STEEL CONSTRUCTION
Enhances MOI For Stability

The KING GrandSport-35 features a Plumbers Neck hosel that is suitable for those that putt with a moderate arc in their stroke. An oversized blade shape features a multi-material 3D printed construction and SIK Face Technology to deliver the straightest and truest rolls on every putt.

MULTI-MATERIAL CONSTRUCTION

An oversized blade shape combines a 3D printed nylon lattice cartridge, a 286g steel frame, a 21g aluminum cap, and 30g of tungsten in the heel and toe to provide the highest MOI for maximum stability.

3D PRINTED NYLON CARTRIDGE

An intricate 3D printed nylon lattice structure optimizes the weight distribution within the putter head to create the highest MOI possible for maximum stability.

SIK ALUMINUM FACE INSERT

An aluminum face insert features SIK Golf's proprietary Descending Loft Technology (DLT), which utilizes 4 descending lofts to ensure the most consistent and accurate roll for every style of putting stroke.

ONE LENGTH SETUP AVAILABLE

The KING GRANDSPORT-35 ONE Length putter features an oversized mallet shape, and is configured at 37.5" to accommodate players that play ONE Length irons, or prefer a taller posture at address to promote consistency and help relieve back pain.

The KING Vintage Cuda putter features an oversized mallet shape with a single bend hosel that is suitable for those with straight back and straight through putting strokes.

CLASSIC OVERSIZE MALLET SHAPE
An oversized mallet shape is constructed using 304 stainless steel and features a single sightline for improved alignment at address.

SIK ALUMINUM FACE INSERT
An aluminum face insert features SIK Golf's proprietary Descending Loft Technology (DLT), which utilizes 4 descending lofts to ensure the most consistent and accurate roll for every style of putting stroke.

ADJUSTABLE WEIGHT SYSTEM
The Cuda putter comes with two 10g sole weights that can be adjusted up to +15g or -5g each (adjusting head weight from +30g to -10g) using heavier weights (5g, 15g, 20g, 25g) to dial in feel and stability. Weights sold separately.

DESCENDING LOFT TECHNOLOGY™

COBRA has licensed SIK Golf's patented DLT™ in an aluminum face insert. Four flat surfaces are milled into the putter face that each descend in loft by 1° from top to bottom (4, 3, 2, 1). DLT™ delivers consistent launch angles from putt to putt which lead to more consistent and predictable rolls.

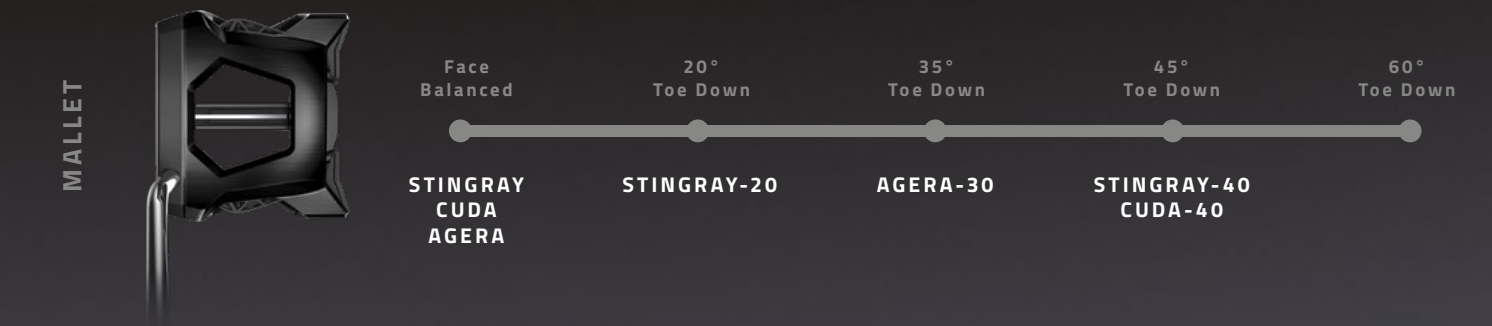

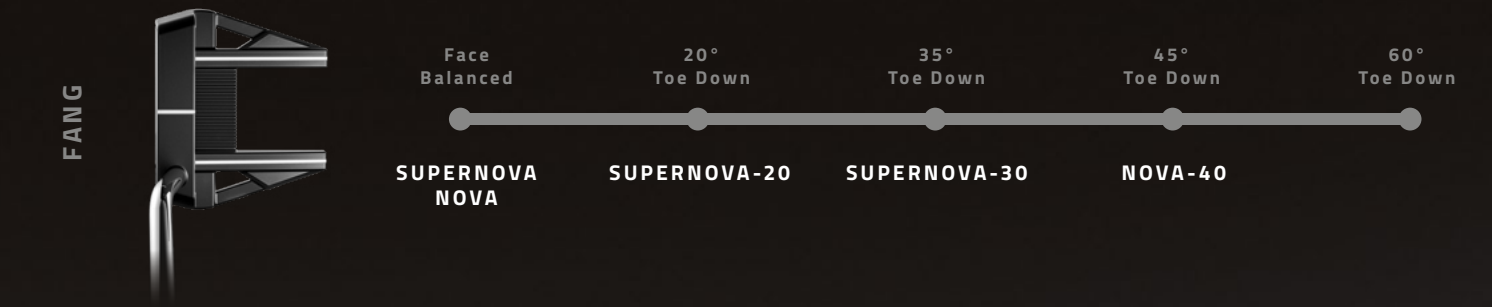

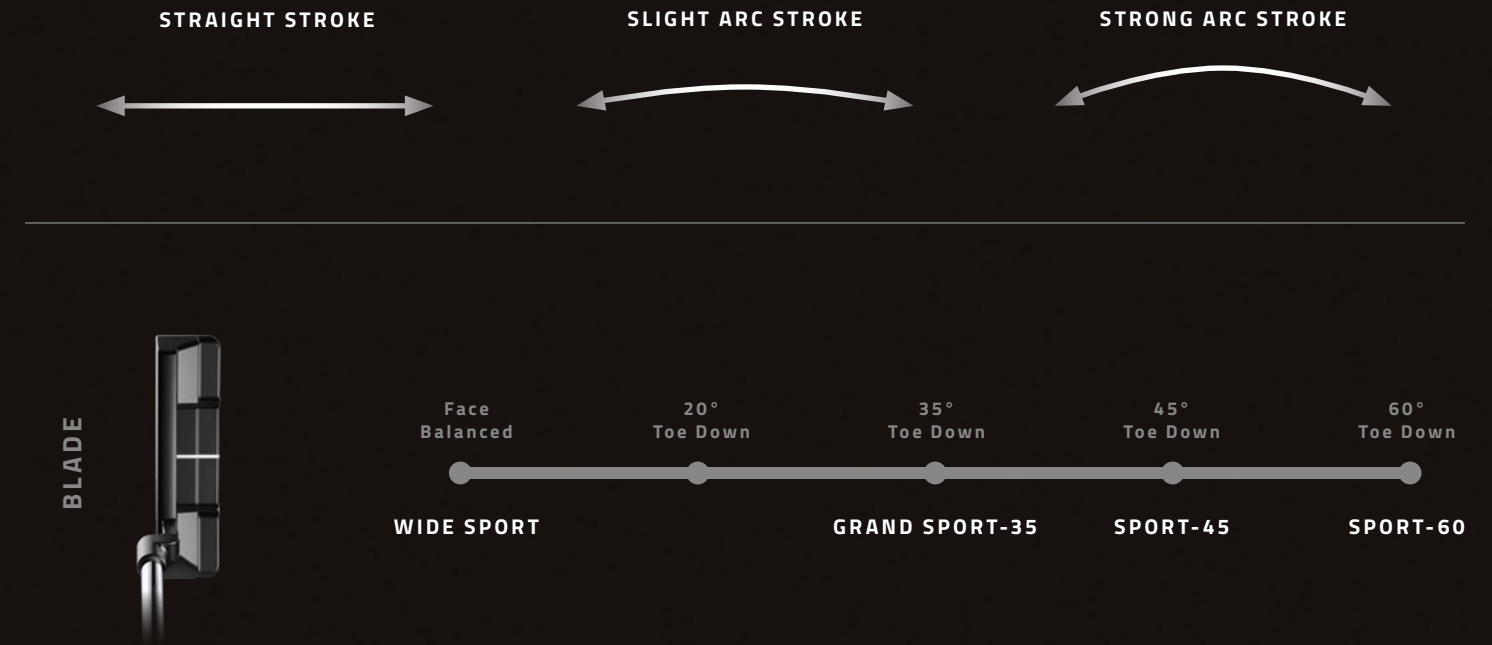

TRUER AND MORE CONSISTENT ROLLS

DLT™ is designed to produce a consistent 1.5 degree launch angle regardless of how much shaft lean, attack angle, and whether the ball comes in contact on the higher or lower portion of the face.

PUTTER FITTING BY STROKE

PLAY SMARTER WITH ARCCOS CADDIE

Each purchase of a KING club qualifies users to redeem free Arccos sensors to equip the rest of their set and a free 45 day trial for Arccos Caddie. Users can pair each club using the Arccos Caddie app on their smart device to start recording shots automatically on course. For users that prefer not to carry a smartphone in their front pocket, alternatives include the Apple Watch (Series 2 or newer), and the Arccos Link, which clips to your belt or pocket and is available for purchase separately on cobragolf.com.

ARCCOS CADDIE APP FEATURES

Arccos Caddie leverages data such as personal shot history, wind speed and direction, and elevation changes, and more to help players make smarter decisions on course and perform their best.
